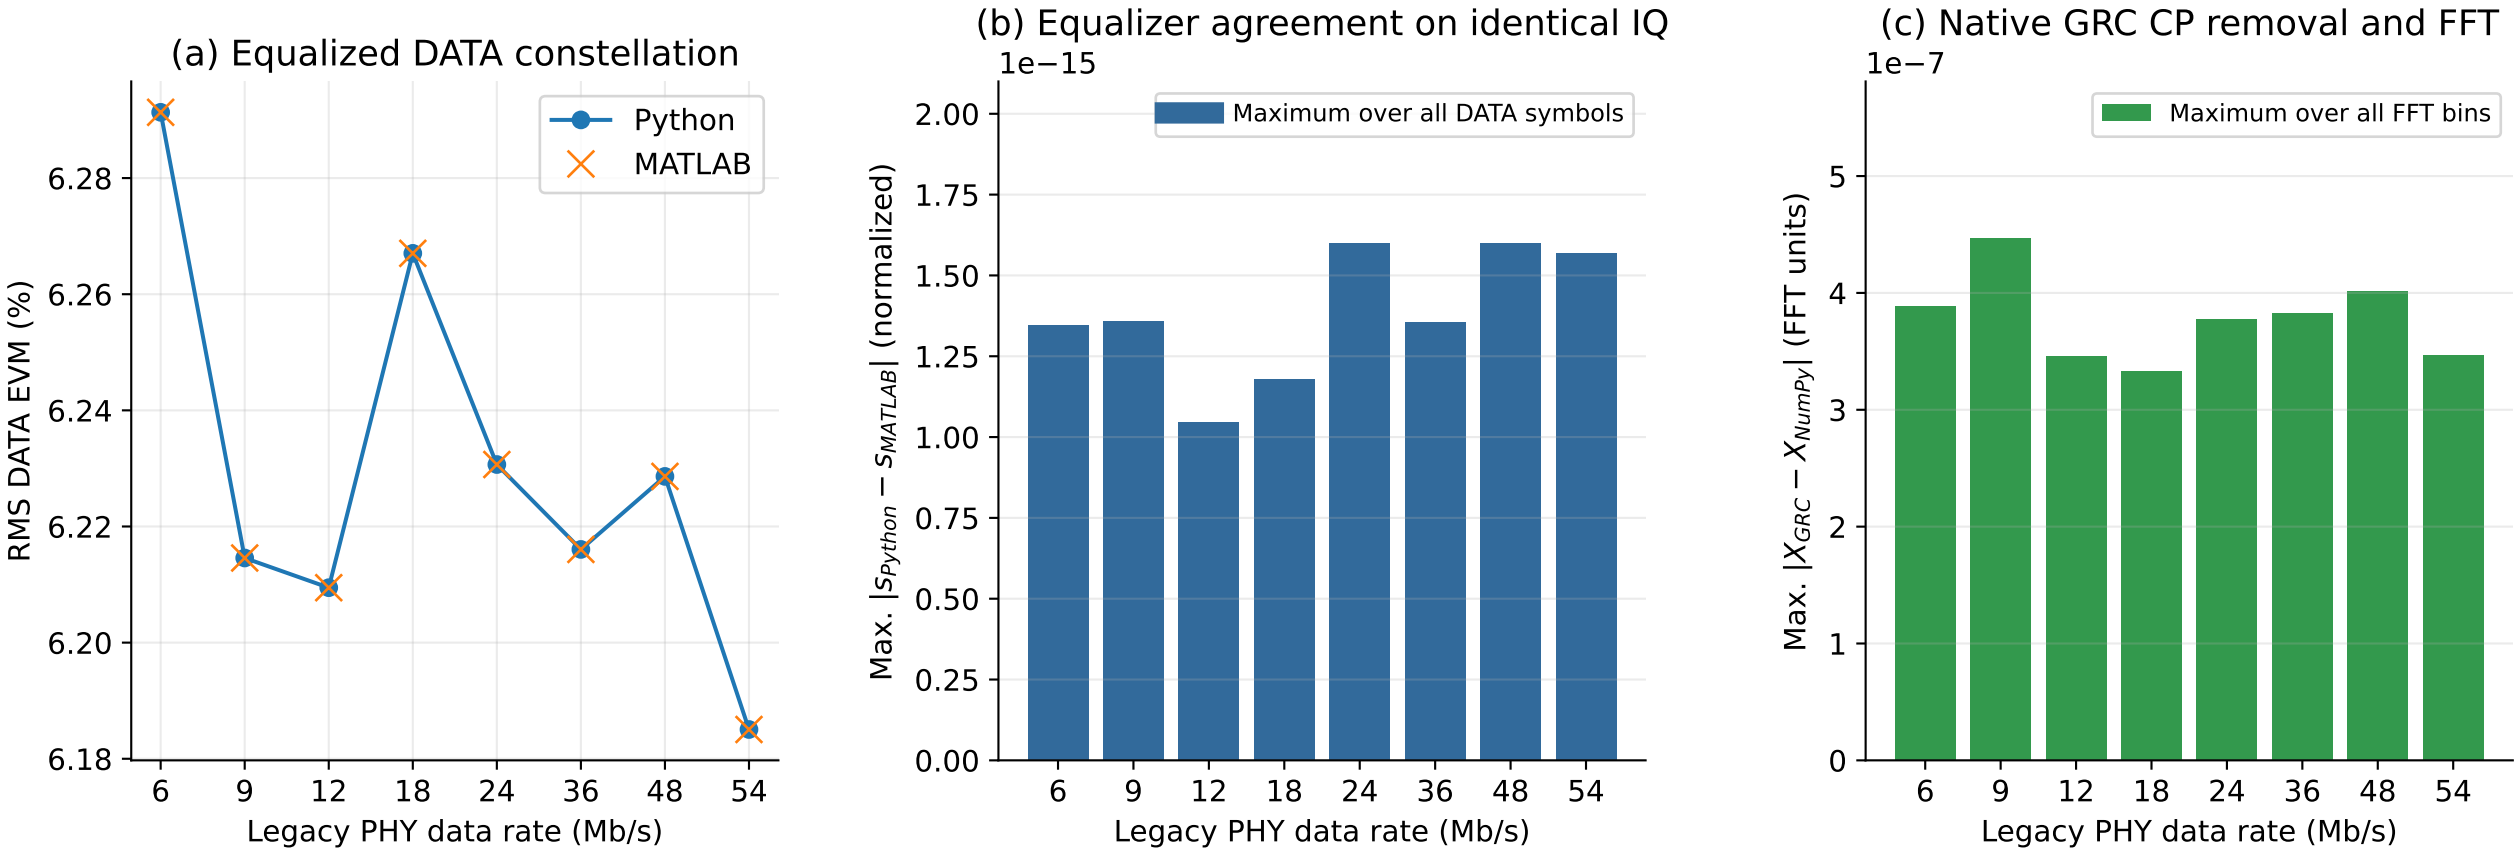
Figure 7. Legacy Wi-Fi replay through GNU Radio: all eight PHY rates



25 dB active-DATA time-sample SNR; 16 × 1000-byte PSDUs/rate; known timing/rate; noisy L-LTF ZF, no payload fitting.

Panel (b): complex128/double receivers. Panel (c): complex64 GRC FFT versus complex128 NumPy FFT; forward FFT without 1/N scaling.
